

INDUSTRIE PARIS 2016: Business and Project Accelerator

Monday to Friday, 4 to 8 April – Paris Nord Villepinte Exhibition Center – Hall 5

INDUSTRIE Paris has proven once again that it is the industry event of the year. From 4 to 8 April, the leading trade show for production technology gave industry professionals the tools to move forward to the factories of the future. For five days, everything was in place to generate projects, business, and investments: the 20,600 visitors attending were able, from the time they entered the trade show, consolidated for the first time under a single roof with 60,000 m², to observe machines, robots, and equipment in operation, discover the latest technology, discuss their experiences, and unlock new markets.

KEY FIGURES FOR INDUSTRIE PARIS 2016

- 20,600 visitors came to explore 60,000 m² of exhibits,
- 9% international visitors,
- 67% responsible for placing orders,
- 1000 exhibitors and brands represented,
- 400 machines (machining, turning, milling, cutting...) and robots in operation,
- 123 innovations presented with Innovation Trophies, 4 with rewards, and 1 Industrial Manager of the Year Trophy was awarded,
- 256 focused business meetings between industry leaders and exhibitors.

THE 2016 PALMÈRES INNOVATION TROPHIES

Last Tuesday, 5 April, at the beginning of the INDUSTRIE 2016 gala, 4 Trophies were awarded in the categories of Eco-Efficiency, New Technology, Digital Tools, and Industrial Performance. Each company, by way of its representatives, came to the stage to receive these highly sought after awards in front of nearly 900 guests.

ECO-EFFICIENCY CATEGORY: **VISION AIR - Prob'air**

NEW TECHNOLOGY CATEGORY: **PRECISE FRANCE SAS - Orbital head for high-precision drilling**

DIGITAL TOOL CATEGORY: **SPRING TECHNOLOGIES - NCSIMUL CAM, NC Programming 4.0**

INDUSTRIAL PERFORMANCE CATEGORY: **ENGINEERING DATA - Easybox T30**

For the first time in Paris, the juries also awarded the Industrial Manager of the Year Trophy rewarding the initiative of an industrial manager who improved the performance of the business.

This year, the Industrial Manager of the Year Trophy was awarded to Guillaume Pain, CEO of Le Joint Technique who led the project to ensure, over three years (2012-2015), controlled and steady growth of the business and its employees. His willingness to involve personnel in the improvement policy continues to bear fruit as growth, performance, and customer satisfaction appear in the business' bottom line.

PARTNERS AND VISITORS WON OVER BY TRADE SHOW DEMONSTRATIONS

Among the 2016 innovations " **Live Painting**" was the major event this year. A complete manual and automatic paint chain in operation was presented to visitors.

In addition, the trade show created its own **Fab Lab** in association with Usine IO, the product and industrialization innovation platform. In a shared space furnished with a full suite of equipment (3D printing, laser cutting, CAD software, etc.), entrepreneur-visitors were able to consult with experts.

Finally, for the first time, INDUSTRIE Paris and the *Société des Ingénieurs Arts et Métiers* (French Engineering Association of Arts and Trades) gathered nearly 100 top business leaders (SME and Mid-size companies) and senior executives at major groups such as Schneider Electric, Shiseido, Dassault Systèmes, and Bouygues Construction.

Furthermore, the high-precision engineering firm [MECACHROME](#) and the marine racing team [BG RACE](#) were honored at **Inside Industrie**. By combining their experiences, these two Made in France companies provided visitors with ideas for innovating and manufacturing in France while remaining competitive.

Revisited for this occasion, **Labo INDUSTRIE** - organized jointly by the *Alliance pour l'Industrie du Futur* (Alliance for the Industry of the Future), Cetim, CEA, Symop, and GL Events - presented in a new format organized around six thematic spaces guiding directors of SME towards the industry of the future. The 25 solutions presented through demonstrations and presentations within 6 thematic spaces attracted 1,096 visitors over 5 days.

The latest innovation this year, the **TV studio** brought together big names in the world of industry (Louis Gallois - Co-President of Fabrique de l'Industrie, Louis Schweitzer - President of Initiative France, Honorary President of Renault and Commissioner General for Investment, Benjamin Gallezot - Assistant to the General Manager of DGE, Philippe Darmayan - President of Alliance Industrie du Futur and President of Arcelor Mittal). *Find a list of all conferences at <http://www.industrie-expo.com/conferences/>*

TRAINING, A PILLAR OF INDUSTRIE PARIS 2016

As industrial manufacturing is one of the sectors that recruits, INDUSTRIE Paris has made an effort, through My Job Industrie, to inform young people about the wealth of the industrial professions and the resulting hiring forecasts. Over 5 days, 334 resumes were submitted and 110 job offers were made. **INDUSTRIE Academy** welcomed 16 schools which conducted demonstrations (3D printing, welding simulators, headsets using mixed reality). **Guided Tours** created a connection between industry professionals and visitors: around a hundred of them (professors, students, team leaders, and guidance counselors) were able to meet with the leading players in manufacturing technology to understand the various industry sectors.

**COME 4 TO 7 APRIL 2017
FOR THE UPCOMING INDUSTRIE LYON**
